Główne umiejętności

React Native
TypeScript
JavaScript

Michał Wojdyla

Software Engineer | React Native & Node.js
Kraków, Woj. Małopolskie, Polska

Podsumowanie

I'm a software engineer with a strong portfolio in mobile apps and beyond. Committed to clean architecture. Feel free to reach out!

Doświadczenie

HEINEKEN Global Shared Services
React Native and Node.js Software Engineer
czerwca 2025 - Present (6 mies.)
Kraków, Woj. Małopolskie, Polska

Ragnarson
React Native and Node.js Software Engineer
lipca 2022 - czerwca 2025 (3 lata)

- Maintained and scaled a large German multi-service mobile application and GraphQL backends
- Designed and implemented custom UI components, animations, and optimized UX
- Built and enhanced features on-demand based on client and stakeholder requests or proposed ideas
- Integrated third-party SDKs, APIs, and company microservices
- Debugged and resolved production issues with deep-dive investigations and hotfixes
- Monitored and optimized KPI metrics
- Measured and improved application performance
- Handled technical investigations
- Led technical presentations
- Managed Android/iOS/Huawei apps separately, including use of platform-specific services
- Conducted code reviews and QA
- Authored technical documentation
- Tracked and responded to analytics, errors (Sentry, Countly)
- Presented features and improvements in internal technical demos
- Cooperated with different company verticals

- Worked in agile (Scrum/Kanban) with direct client communication

Projects:

- Multi-service consumer app for German market (full-stack mobile & backend features)

Aexol

React Native Software Engineer

lutego 2021 - lipca 2022 (1 rok 6 mies.)

- Developed and deployed mobile applications and MVPs for clients in food delivery, logistics, healthcare, and education
- Maintained production apps and implemented new features based on client feedback
- Worked directly with stakeholders to define requirements and iterate fast

Projects:

- Cash Voucher Transfer App – App for sending vouchers between users
- Telehealth App – Communication platform for doctors and patients (video, chat, scheduling)
- Food Delivery App (Drivers) – App for managing deliveries
- Food Delivery App (Restaurant) – App for restaurants to handle orders
- Food Ordering App – Online grocery
