Główne umiejętności

Ansible

Apache Kafka

Red Hat Linux

Languages

Polish (Native or Bilingual)

English (Full Professional)

Certifications

Red Hat® Certified System
Administrator (RHCSA®)

AWS Certified Cloud Practitioner

Red Hat Certified Specialist in
Developing Automation with Ansible
Automation Platform

Python 101 for Data Science

Data Analysis with Python

Łukasz A.

Senior Kafka DevOps Engineer | Platform Engineering | Kubernetes
& Cloud Infrastructure
Rybnik, Woj. Śląskie, Polska

Podsumowanie

Senior Kafka DevOps Engineer with a strong background in network
engineering and growing expertise in infrastructure automation.
Acting as part of a platform engineering team, designing and
operating secure Apache Kafka environments across AWS and On-
Prem infrastructure.
Work includes automation, observability, and Kubernetes based
deployments (Kustomize + custom operators), as well as developing
metrics exporters and tooling that improve platform visibility and
reliability.

Key strengths:
Ansible (expert), Linux (advanced), Apache Kafka (advanced),
Python (strong working knowledge), Kubernetes, Prometheus,
Grafana, Jenkins, GitHub Actions (solid working knowledge across
these tools), Go (developing proficiency).

Doświadczenie

Volkswagen Group Services sp. z o.o.
3 lata 2 mies.

Senior Kafka DevOps Engineer
lutego 2023 - Present (2 lata 10 mies.)

- delivering and maintaining the Apache Kafka platform as part of the platform
engineering team, ensuring strong security and reliability standards
- developing Terraform scripts and Ansible collections for cluster deployments
on AWS and On-Prem (RHEL / Ubuntu)
- building and operating CI/CD pipelines using Jenkins and GitHub Actions
- providing management clusters and a full observability stack (Prometheus +
Grafana)
- developing custom metrics exporters (Python / Go), exposed via Nginx
- integrating and supporting Kafka Connect components, including MirrorMaker
2, JDBC and Debezium connectors

- designing and developing Kubernetes based deployments and custom operators (Go)
- planning and executing a non-disruptive migration of the platform to Kubernetes
- maintaining platform documentation and providing knowledge transfer to Ops teams
- troubleshooting and performing root-cause analysis for complex platform issues

BI DataProxy - Automation & Advanced Support Specialist
października 2022 - stycznia 2023 (4 mies.)

- learning the Kafka platform architecture, deployment model and operational workflows
- extending and streamlining Ansible collections to manage Kafka and related platform services via systemd

Kyndryl
Senior IT Specialist - Data Center Network Department
października 2021 - września 2022 (1 rok)
Katowice, Śląskie, Poland

- developing and deploying Ansible Playbooks for network tasks automation
- managing Ansible Tower platform and git projects
- extensive hands-on experience with Python scripting for jobs automation and data analysis
- high priority TAC case handling for software and hardware issues
- supporting 2nd and 3rd line on complex or troublesome matters
- high level of participation with Architects in various network projects
- Data Center network infrastructure maintenance - Cisco Nexus N9k, N7k, N6k, N5k, N2k
- cooperation with internal team on the network infrastructure monitoring system
- BAU support, working on incidents and service requests
- close cooperation with WAN links providers in a case of a link failure or degradation

IBM
Senior IT Specialist - Data Center Network Department
marca 2016 - października 2021 (5 lat 8 mies.)
Katowice

- developing and deploying Ansible Playbooks for network tasks automation

- extensive hands-on experience with Python scripting for jobs automation and data analysis
- high priority TAC case handling for software and hardware issues
- supporting 2nd and 3rd line on complex or troublesome matters
- high level of participation with Architects in various network projects
- Data Center network infrastructure maintenance - Cisco Nexus N9k, N7k, N6k, N5k, N2k

Kompania Węglowa S.A.
Senior Network Specialist
lipca 2008 - marca 2016 (7 lat 9 mies.)
Rybnik, Woj. Śląskie, Polska

- developing WAN/LAN networks based on Cisco routers and switches, as well as Juniper routers
- maintaining local Data Center networks – Cisco Nexus N7k, N5k, N2k
- managing network edge infrastructure – Juniper, Palo Alto
- site-to-site VPN implementation for branch offices – Juniper SRX
- radio link equipment configuration – Ericsson Mini-Link
- ensuring 24x7 network operability, monitoring tools configuration, network troubleshooting

Hugart Sp. z o.o.
Automation Service Engineer
lutego 2008 - lipca 2008 (6 mies.)
Świerklany, Woj. Śląskie, Polska

- designing power distribution units and automation equipment for industrial packaging machines
